## CYLINDERS/TANKS ACCEPTANCE POLICY

The following Myers Iron Salvage and Rolloffs acceptance policy regarding compressed and liquefied gas cylinders and tanks, including but not limited to propane gas tanks, industrial gasses, one-time use tanks (such as refrigerants, adhesives, and helium), storage tanks, and drums.

Tanks and cylinders are to meet the following conditions to be accepted as scrap metal:

- **Propane Tanks** must either be cut in half or valves removed with a minimum of a 2 inch hole in the side.
- **Gas Cylinders** must have valves removed and a minimum 3 inch hole in the side.
- Non-refillable, one-time use **thin-walled pressurized tanks**, such as those used for refrigerants or helium, are to have the pressure relief valve punctured and painted with a high visibility "X"
- **Large Liquid Tanks** must have a minimum 2 foot hole on at least 2 sides with **NO** residual contents.
- **Drums/Other Small Containers** must be open topped, cut in half, or crushed to a maximum 3 inch height with no residual contents.
- Other Containers not listed please contact us at 308-880-0309

Myers Iron Salvage and Rolloffs will **NOT** accept the following:

- Containers that have **NOT** been decommissioned as described above or safely inspected
- **NO** acetylene tanks
- **NO** small, one-time use propane tanks, such as those used by small torches or camping stoves.

All cylinders and tanks are to be declared at the scale and made available for inspection by Myers Iron Salvage personnel. If not declared, items or the entire load will be rejected and returned at supplier's expense and/or deduction assessed, including cost of decommissioning if not promptly and safely removed from Myers Iron Salvage premises.

Effective: 5/8/2024

By: Management & Safety and Compliance Team
